DATE MAILED: 05/05/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Advisory Action

Application No.	Applicant(s)
10/812,398	GOLDBERG ET AL.
Examiner	Art Unit
Mark T. Henderson	3722

	Defere the Eiling of an Annual Drief					
	Before the Filing of an Appeal Brief	Examiner	Art Unit			
		Mark T. Henderson	3722			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address						
THE REPLY FILED <u>25 April 2006</u> FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.						
1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:						
	 a)					
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL						
2. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).						
AMENDMENTS						
The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because (a) They raise new issues that would require further consideration and/or search (see NOTE below); (b) They raise the issue of new matter (see NOTE below); (c) They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for						
appeal; and/or						
(d) They present additional claims without canceling a corresponding number of finally rejected claims.						
NOTE: (See 37 CFR 1.116 and 41.33(a)).						
	The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324). Applicant's reply has overcome the following rejection(s):					
	Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).					
7. Solution For purposes of appeal, the proposed amendment(s): a) solution will not be entered, or b) solution will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows: Claim(s) allowed: 7-12. Claim(s) objected to: 3-6.						
	Claim(s) rejected: <u>1 and 2</u> . Claim(s) withdrawn from consideration:					
AFFIDAVIT OR OTHER EVIDENCE						
3. 🗀	The affidavit or other evidence filed after a final action, but because applicant failed to provide a showing of good and was not earlier presented. See 37 CFR 1.116(e).	it before or on the date of filing a No d sufficient reasons why the affiday	otice of Appeal will <u>no</u> vit or other evidence is	t be entered s necessary and		
 The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will <u>not</u> be entered because the affidavit or other evidence failed to overcome <u>all</u> rejections under appeal and/or appellant fails to provide a showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1). The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached. 						
	The request for reconsideration has been considered but	it does NOT place the application in	n condition for allowar	nce because:		
2. Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s).						
3. ☐ Other: See Continuation Sheet.						
		SUPERV	ISORY PATENT EX	AMINEH		

Continuation of 13. Other: In regards to applicant's argument that the Alden reference does not disclose a "wing", the examiner submits that Alden does indeed disclose "a wing having flanges folding to form a tube" in its broadest interpretation, since applicant has not disclosed the structural limitations of a "wing" in detail to overcome the the Alden reference.

Continuation of 13. Other: In regards to applicant's argument that the Alden reference does not disclose a "wing", the examiner submits that Alden does indeed disclose "a wing having flanges folding to form a tube" in its broadest interpretation, since applicant has not disclosed the structural limitations of a "wing" in detail to overcome the the Alden reference.

§Appl. No. 10/812,398 Amdt. dated April 25, 2006

Reply to Office Action of, March 8, 2006

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended) A bookmark comprising:

an elastic band having a selected width between two edges and a selected thickness, the elastic band being expandable from a relaxed condition to a stretched condition when placed over a page of a book and over an outside cover of the book;

a slider mounted on the elastic band, the slider having an outer surface facing away from the elastic band and an inner surface facing toward the elastic band;

an image support area on the outer surface of the slider, the image support area having a width greater than the width of the elastic band and having a display surface with an image thereon;

first and second wings extending from the display surface, the first and second wings having flanges thereon which are folded to form first and second tubes for receiving the elastic band therethrough with the elastic band being exposed between the first and second tubes for direct contact with a cover of a book with which the bookmark is used, and

first and second gaps in the first and second tubes, the gaps being between opposed edges of the flanges folded to form the first and second tubes, the gaps each having a width sufficiently large to receive at least one of the edges of the elastic band therethrough when the elastic band is stretched.

Claim 2 (Previously Presented) The bookmark of claim 1 wherein the image support area of the slider has a sticker adhered thereto, the sticker having an image on a front surface thereof and

§Appl. No. 10/812,398

Amdt. dated April 25, 2006

Reply to Office Action of, March 8, 2006

adhesive on the inner surface thereof, wherein the sticker is secured by the adhesive to a display surface on the image support area.

Claim 3 (Cancelled)

Claim 4 (Currently Amended) The bookmark of claim 2 3 wherein the display surface is circular and the sticker is circular.

Claim 5 (Previously Presented) The bookmark of claim 4 wherein the tubes have internal edges and external edges, the internal edges being spaced from one another by the diameter of the display surface wherein the band is exposed as the band extends beneath the display surface.

Claim 6 (Original) The bookmark of claim 5 wherein when the elastic band is in the relaxed condition it frictionally engages with the inner surfaces of the tubes and the edges of the tubes with a higher frictional force than occurs when the band is relaxed.

Claim 7 (Previously Presented) A bookmark comprising:

an elastic band having a selected width between two edges and a selected thickness, the elastic band being expandable from a relaxed condition to a stretched condition when placed over a page of a book and over an outside cover of the book;

3

GBAND-0003

§Appl. No. 10/812,398 Amdt. dated April 25, 2006 Reply to Office Action of, March 8, 2006

a slider mounted on the elastic band, the slider having an outer surface facing away from the elastic band and an inner surface facing toward the elastic band, the outer surface having a rim portion;

an indented display surface on the outer surface of the slider defined by the rim portion, the indented display surface having a width greater than the width of the elastic band;

a sticker adhered to the indented display surface with the rim portion extending around the sticker, the sticker having an image on a front surface thereof and adhesive on a back surface thereof wherein the sticker is secured by the adhesive to the indented display surface;

first and second wings extending from the indented display surface, the first and second wings having flanges thereon which are folded to form first and second tubes for receiving the elastic band therethrough with the elastic band being exposed between the first and second tubes for direct contact with a cover of a book with which the bookmark is used, and

first and second gaps in the first and second tubes, the gaps being between opposed edges of the flanges folded to form the first and second tubes, the gaps each having a width sufficiently large to receive at least one of the edges of the elastic band therethrough when the elastic band is stretched.

Claim 8 (Previously Presented) The bookmark of claim 7 wherein the indented display surface is circular and the sticker is circular.

GBAND-0003

§Appl. No. 10/812,398

Amdt. dated April 25, 2006

Reply to Office Action of, March 8, 2006

Claim 9 (Previously Presented) The bookmark of claim 8 wherein the tubes have internal

edges and external edges, the internal edges being spaced from one another by the width of the

indented display surface wherein the band is exposed as the band extends beneath the indented

display surface.

Claim 10 (Previously Presented) The bookmark of claim 9 wherein when the elastic band is

in the relaxed condition it frictionally engages with the inner surfaces of the tubes and the edges of

the tubes with a higher frictional force than occurs when the band is relaxed.

Claim 11 (Previously Presented) The bookmark of claim 7 wherein the tubes have internal

edges and external edges, the internal edges being spaced from one another by the width of the

indented display surface wherein the band is exposed as the band extends beneath the indented

display surface.

Claim 12 (Previously Presented) The bookmark of claim 11 wherein the tubes have internal

edges and external edges, the internal edges being spaced from one another by the width of the

indented display surface wherein the band is exposed as the band extends beneath the indented

display surface.
